Introduction

Team Challenge:

“Identify a communication issue on college campuses and provide an innovative solution”

Team Members:

Holmdel:

- Kasey McFadden
- Christine Mauro
- Matt Lu

Atlanta:

- Regine Lewis
- Ashna Momin

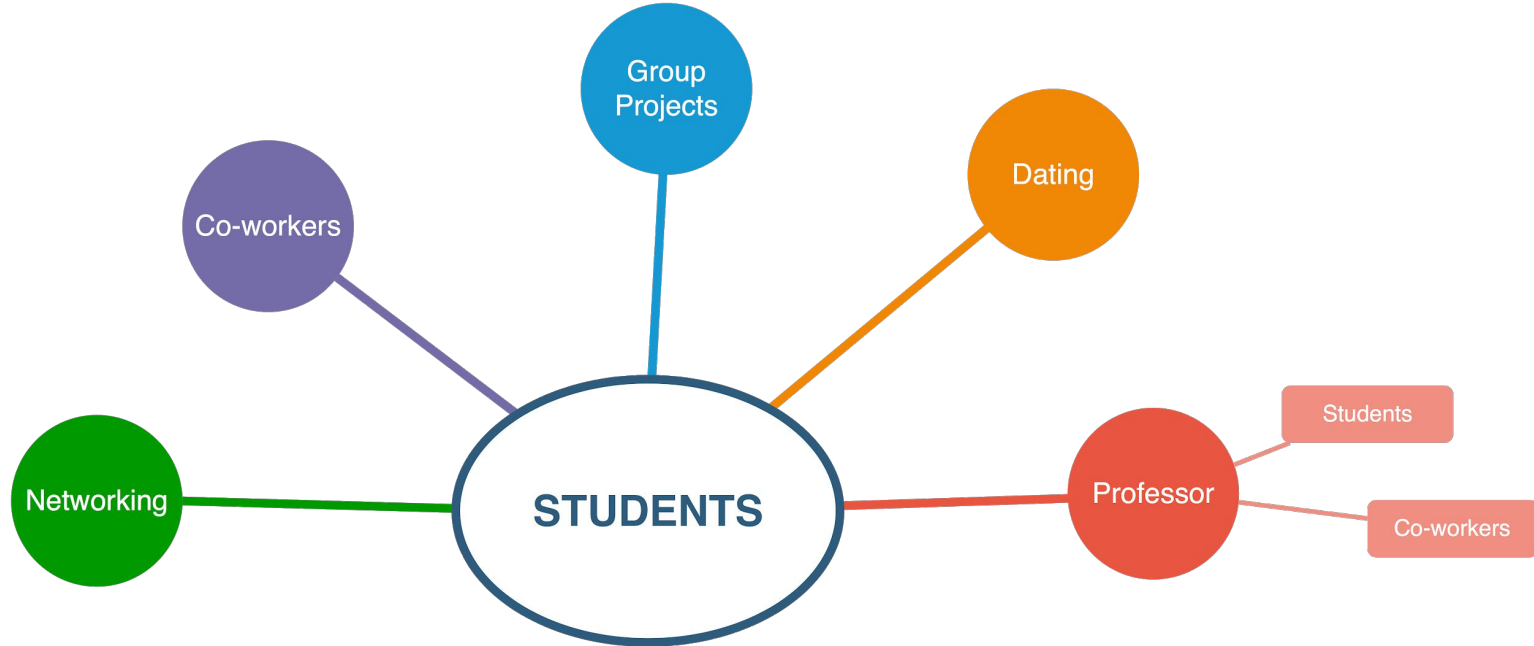

Overview

Why should students, professors, and college staff have to expose their personal phone numbers to effectively communicate?

- Students, faculty, and campus staff often compromise their privacy to communicate with others that they work with on academic contexts.
- Professors disclose their personal phone numbers to college students for after-hours help.
- Students give out their numbers to other students to collaborate on projects.
- **People shouldn't have to change the way they communicate to protect their privacy.**

Buyer Needs Perspectives

What Are My Options?

- Offers virtual phone numbers for different contexts
- Can “burn” numbers and data at any time
- In-app communication only
 - Text/image SMS, voice calls
 - Image SMS limited to certain plans

- Provides **one** Google Voice number through the app (must use backup phone number to verify)
- Can forward SMS and calls to personal number

SWOT Analysis

Strengths

- Competitive pricing
- Nexmo software
- Cell data not required/used for out-of-app communication

Weaknesses

- Few major differentiating features from competitors
- Not a well-known market

Opportunities

- Recent targeted marketing tactics and privacy exploitation has consumers worried about releasing personal contact info
- Not a well-known market; opportunities for making our product/brand top-of-mind
- Expand audience and usage possibilities outside of college students/professors

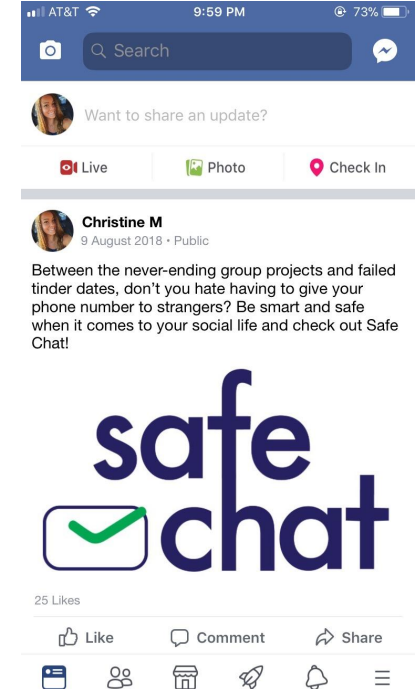

Threats

- Target audience may not want to pay for the product
- Increase in communication through school-provided platforms

Marketing Plan: Promotional Strategy

- Campus/Student Ambassadors
 - Free social media promotion
 - Ambassadors receive 3 free lines
- Refer a friend discount
- Email promotion
 - Reach professors and students

Looking forward...
